

We're Bringing Fiber to You!

Benefits of a Fiber Optic Network:

- **It's the Best** - Fiber is the best communication technology in the world - you're going to have it.
- **Remote Options** - You can work from home, attend school with distance learning or access doctors from your computer.
- **Life in the Heartland** - This connectivity makes our communities a desirable place to live, work and raise a family, attracting those who want both the rural way of life and world class Fiber communications.
- **Stronger Tax Base & Property Values** - More people, homes, & businesses mean a larger and stronger tax base; local governments can use that to support our schools and areas. Fiber means your property is worth more in the future.
- **Progressive Farming** - Precision agriculture, and the many opportunities it brings for farmers, is made possible by Fiber Internet.
- **You'll Be in the Top 30%** - This new network will put you in the top 30% of US citizens who have fiber available to them!

You'll see Evertex & contractor trucks in your area. They are helping us plan & construct this project.
