The WiFi experience you deserve

Ultimate WiFi Coverage is delivered with GigaSpire Routers

Great Internet is made better when your WiFi is top-of-the-line. Evertek is proud to introduce WiFi routers that meet that standard from our technology partner, Calix. The GigaSpire u6 and u4, both provide you the best WiFi coverage available...and they cut interference to boot. You can even add a GigaMesh unit, to expand your coverage in your home.

GigaSpire BLAST u6

The GigaSpire BLAST u6 gives you high performance speed, delivering lightning-fast and complete coverage in your home. It is the router that delivers Internet in your home! WiFi 6 technology allows your newest devices to perform their best.

GigaSpire BLAST u6

- Both 5ghz & 2.4ghz WiFi networks - newer devices love the 5ghz, older devices need the 2.4. All your devices can connect at their optimum level.
- Since devices can connect at the level best for them - interference is reduced, giving you the best experience.
- u6 is WiFi 6 capable. This gives you (and your devices) the speed & reliability you need for streaming, smart home & more
- Connect & use all your devices simultaneously - more than 40 connections possible.
- 4 Ethernet ports - to hardwire your fixed location devices, like gaming consoles and SmartTvs, for the fastest/best connections.
- You may add a GigaMesh unit to expand coverage in your home

GigaSpire BLAST u4

The u4 has a minimalist, compact design, but it is packed with the same features as the u6. WiFi 6 technology allows your newest devices to perform their best.

- Both 5ghz & 2.4ghz WiFi networks - newer devices love the 5ghz, older devices need the 2.4. All your devices can connect at their optimum level.
- Since devices can connect at the level best for them - interference is reduced, giving you the best experience.
- u4 is WiFi 6 capable. This gives you (and your devices) the speed & reliability you need for streaming, smart home & more
- Connect & use all your devices simultaneously - more than 40 connections possible.
- 2 Ethernet ports - to hardwire your fixed location devices, like gaming consoles and SmartTvs, for the fastest/best connections.
- You may add a GigaMesh unit to expand coverage in your home

GigaSpire BLAST u4

These WiFi routers are what we use to provide you the best WiFi coverage with our Internet products.

Existing customers, if you would like one of these routers, contact us so we can schedule your installation.

CommandIQ

Delivering everything you need to control every aspect of your home WiFi experience

The CommandIQ App allows you to manage your home or business WiFi network from your mobile phone when you have a GigaSpire BLAST u6 or u4. You can download the app from the Apple or Google store to take charge of your home network today!

### CommandIQ allows you to Manage the People, Places & Things that Connect to Your Network

- People, Places, Things: Organize your devices for easy control and management. Turn on/off the Internet for specific people, or devices in your household
- Network Control: Easily change your Internet network name and password
- Basic Parental Controls: Schedule Internet access to automatically turn on and off for your kids
- Guest Networks: Got company coming? Set up a network to give them easy access while protecting your main network
- Speed Test: See how fast your network is running with a simple tap

Setting up the CommandIQ App

1. Download the app from the Apple App Store or Google Play Store. Search for 'CommandIQ', then install it on your mobile device.
2. Select 'SIGN UP' towards the bottom of the screen.
3. Enter your information. The password you enter here will be used to access the app. Note: Please wait at least 10 minutes after your router has been 'turned up' before attempting step 4.
4. Tap the QR code that appears within the app. (You will be asked to allow the app to access your camera.) Then point your device's camera at the QR Code found on your router.
5. Select OK.
6. Name your network and create a password. The Router Name will be used throughout the app. The Network Name (SSID) is what you will use as your wireless connection name. Select a password for your wireless network.
7. Click 'Submit' and you're done!You may add a GigaMesh unit to expand coverage in your home

To use CommandIQ, you'll need a GigaSpire BLAST u6 or u4 WiFi router.

Existing customers, if you would like one of these routers, contact us so we can schedule your installation.
